DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6-9 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Traa (US006222660B1).

3. Regarding claims 1, 2, 6-9 and 11-14, Traa discloses an optical receiver for receiving an optical communication signal, the receiver comprising: a photodiode (10) for converting the optical communications signal into a corresponding electrical signal; detector means (28 or 28 and 30) responsive to the electrical signal for detecting a performance parameter indicative of an eye opening of the optical signal (since the parameters, such as bit error rate, is an indicative of an eye opening of the optical signal, Traa discloses the electrical signal for detecting a performance parameter indicative of an eye opening of the optical signal), a processor (18) for calculating a bias point of the photodiode that optimizes a value of the detected performance parameter (abstract); and a bias generator (12) for supplying a bias signal to the photodiode based on the calculated bias point. Traa also discloses the performance parameter comprises any one of: an eye opening ratio; an optical signal to noise ratio; an eye quality; and a bit error rate (32). Traa also discloses the detector means comprises a clock and data

recovery (CDR) circuit of the receiver. Traa also discloses the detector means comprises a detector circuit associated with a clock and data recovery (CDR) circuit of the receiver.

Allowable Subject Matter

4. Claims 3-5, 10 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: Prior art discloses the invention set forth above. Prior art does not disclose a method of comparing a current value to a previous value of the performance parameter and calculating an adjustment step size and direction based on the comparison result.
